

# My experiences in Germany

That was my first time in Germany so I was really looking forward to this trip.

When we arrived to the accomodation the first impression of our exchange partners was excellent. We lived in a boarding school which I found very different to our school in Hungary. It was comfortable, tidy and homely like a hotel. I also really liked that it was separated from the big city life, because it was in the middle of a forest. They organised many programmes such as horse riding and cooking our national food, which was so much fun. We also visited the Christmas Market in Ulm and also had a chance to climb the top of the church which is the highest peak of the town. Last day we went to Stuttgart where we visited the Porsche Museum, the Natural Science Museum and the Stuttgart Christmas Market, which was much bigger than the

previous one. Every day we were working on a project, in the library. The topic's name was „There is no planet B”, so we had to deal with electricity, environment, food etc. Three different countries' students were there from Scotland, Germany and of course us, the Hungarians. We got on well with everyone, had lot of fun, and in my opinion my English has developed, because we were speaking in English all day, which was quite exhausting after a while.

In a conclusion, I enjoyed every moment of this journey, and I recommend this programme to everyone, because I only had good experiences.
